Transboundary Grasslands Workshop

Ranchers Stewardship Alliance

Presented by Leo Barthelmess

Mission Statement:

Ranching, Conservation, Communities - a Winning Team!

The mission of the Ranchers Stewardship Alliance is to promote the ecological, social and economic conditions that will sustain the biodiversity and integrity of America's northern mixed-grass prairie for present and future generations

The Ranchers Stewardship Alliance is a 501(c)(3) nonprofit. We are headquartered in north-central Montana. Our rancher-led conservation organization works to continually strengthen our rural community, economy and culture. We do this through wise stewardship of the prairies that are the foundation of our way of life. Our multi-generational ranch families run livestock operations across millions of acres of intermingled private, public and tribal lands.

Grassland Sustainability is it possible?

Weather builds resilience

SUSTAINABLE BEEF?

Do we go it alone?
